

Name: _____

Primary 5-a-day

Bronze

23rd February

$$45 \div 5$$

9

$$30 \times 30$$

900

Oscar buys an apple.
He pays with a £2 coin.

This is his change

$$£1 + 50p + 5p = £1.55$$

How much was the apple?

$$\begin{array}{r} 2.00 \\ - 1.55 \\ \hline 0.45 \end{array}$$

45p

This pictogram shows the number of cars that left a car park

Key
 = 2 cars

How many cars left the car park between 6am and 7am?

$$4 \times 2 = \underline{\underline{8}}$$

How many cars left the car park between 9am and 10am?

$$2 + 2 + 1 = \underline{\underline{5}}$$
