

Name: Angus

Primary 5-a-day

Gold

16th April

Simplify $\frac{6}{30} \div 6$

$$\frac{1}{5}$$

$4.56 + 1.9 + 10.88$

$$\begin{array}{r} 4.56 \\ 1.9 \\ 10.88 \\ \hline 17.34 \end{array}$$

$$17.34$$

Find the size of angle x

$$157 + 90 = 247$$

$$\begin{array}{r} 360 - 247 \\ = \underline{\underline{113}} \end{array}$$

Norman chooses two numbers.

He multiplies the two numbers and divides the result by 2.

His answer is 306.

One of Norman's numbers is 9.

What is Norman's other number?

$$306 \times 2 = 612$$

$$612 \div 9 = 68$$

Work out the mean

14 12 18 19 17

$$\text{Total} = 80$$

$$80 \div 5 = \underline{\underline{16}}$$
