Eva bought three cups of tea.
She pays with a £20 note.
Her change is £14.75
What is the cost of **five** cups of tea?

$20 - 14.75 = \cancel{5.25}$
 $5.25 \div 3 = \cancel{1.75}$ per 1 tea
 $1.75 \times 5 = \underline{\underline{8.75}}$

Joshua has £4 to spend on oranges.
Small oranges cost 15p each
Large oranges cost 25p each
He decides to buy only small oranges or only large oranges.
How many **more** small oranges than large oranges can he buy for £4?

$4 \div 0.15 = 26.66..$
 26 small
 $4 \div 0.25 = 16$
 16 large
 $26 - 16 = \underline{\underline{10}}$

For each pattern put a tick if it has a line of symmetry. Put a cross if it does not.
