

Name: Amber

Primary 5-a-day

Gold

25th August

$484.5 \div 100$

Grid area for the first problem. The answer  $4.845$  is written in a box at the bottom right.

$4.845$

$\frac{3}{4} - \frac{5}{16}$

Grid area for the second problem. The calculation  $\frac{12}{16} - \frac{5}{16} = \frac{7}{16}$  is written in the middle. The answer  $\frac{7}{16}$  is written in a box at the bottom right.

$\frac{12}{16} - \frac{5}{16} =$

$\frac{7}{16}$

Measure this angle

$100^\circ$

Diagram of an angle drawn with red lines. A blue arc indicates the angle, which is labeled  $100^\circ$ .

The table shows the number of people living in three different countries.

Country	Population
Canada	36,624,199
Mexico	129,684,378
Turkey	81,127,417

What is the difference between the numbers of people living in Mexico and Canada.

Handwritten subtraction:  $129,684,378 - 36,624,199 = 93,060,179$

$2.5 \text{ tonnes} = \boxed{2500,000} \text{ grams}$

$2.5 \times 1000 \times 1000 = 2,500,000$
