

12th May

$0.008 + 0.55 + 0.093$

A teacher asks some girls and boys what they wanted to do on a school trip

What percentage of girls wanted to go to the zoo?

Handwritten calculation: $90 - 55 = 35\%$

The result **35%** is written in large letters.

12 boys wanted to go bowling.

Estimate how many boys wanted to go to the cinema.

Handwritten calculation: $12 - 30\% = 6$

The result **6** is underlined.

Four friends are in a race.

Alice is 5 metres ahead of Barry

Clara is 10 metres behind Dylan

Barry is 3 metres behind Dylan

Write the names of the runners in order, starting with the friend who is furthest ahead

Handwritten list of runners in order: **Alice, Dylan, Barry, Clara**
