Ella is making rice

The recipe says he needs 250 grams of rice for 3 people.

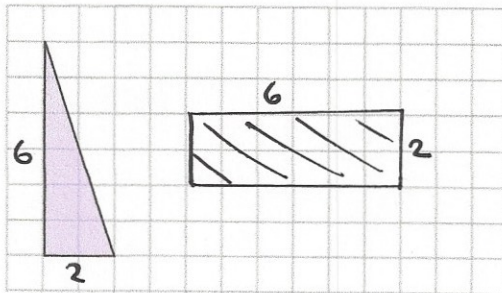

How many **kilograms** of rice does she need for 9 people?

$$\begin{aligned}
 250 \times 3 &= 750\text{g} \\
 &= \underline{0.75\text{kg}}
 \end{aligned}$$

Draw a rectangle on the grid that has an area **twice** the area of the triangle.

$$\begin{aligned}
 6 \times 2 \div 2 &= 6\text{cm}^2 \\
 6 \times 2 &= 12\text{cm}^2
 \end{aligned}$$

The factors of 14 have a sum of 24.

Show the factors of 15 also have a sum of 24.

$$\begin{aligned}
 15 &= 1 \times 15 \\
 &= 3 \times 5
 \end{aligned}$$

$$1 + 3 + 5 + 15 = \underline{24}$$
