$50 \div 5 =$

10

Orla has three blocks.

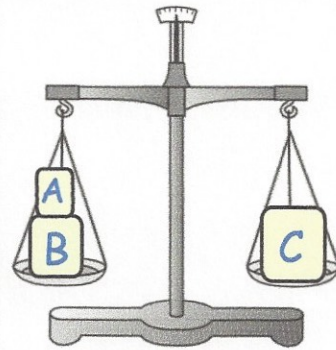

Blocks A and B together weight the same as block C.

The three blocks weigh 1.9kg altogether.

Block A weighs 400g.

How much does block B weigh?

0.55kg or 550g

C weights $1.9 \div 2 = 0.95\text{kg}$

A weighs 0.4kg

$$B = 0.95 - 0.4 = 0.55\text{kg}$$

Find the size of angle x

$$13 + 90 + 90 + 85 = 278$$

$$360 - 278 = \underline{82}$$
