$$90 + 3 \times 2^2$$

$$3 \times 2^2 = 12$$

102

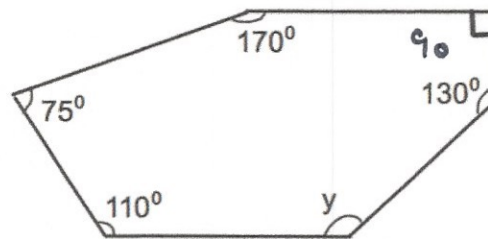

$$0.2 \times 2,000$$

400

Find the size of angle y .

$$\text{total} = 4 \times 180 = 720^\circ$$

$$y = 720 - 575 \\ = \underline{145^\circ}$$

Circle two numbers that multiply together to equal **100 million**

200 (500) 1,000 2,000

20,000 100,000 (200,000)

Work out the highest common factor (HCF) of 300 and 120

60
