10th February

$51 - 63$

$$\dfrac{2}{9} + \dfrac{2}{3}$$

$$\dfrac{2}{9} + \dfrac{6}{9} = \dfrac{8}{9}$$

| -12 | | $\dfrac{8}{9}$ |

Find the size of angle x

$212 + 77 + 40 = 329$

$360 - 329 = 31$

$x = 31$

Write down 3 common multiples of 4 and 6.

8 drinks cost £12.

Work out the cost of 14 drinks.

$12 \div 8 = £1.50$

$£1.50 \times 14 = £21$
