Name: _____ Primary 5-a-day Silver

9th September

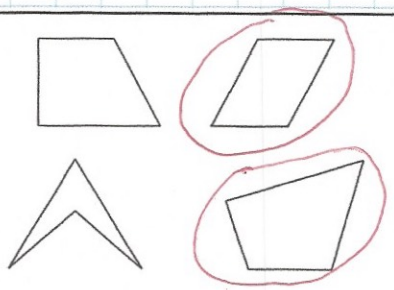
$\frac{2}{9} + \frac{3}{9}$

$\frac{5}{9}$

$4{,}000 \div 10$

400

Circle any **quadrilateral** with exactly two obtuse angles

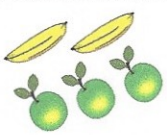


In a shop, 3 apples cost the same as 2 bananas

One apple costs 48p

How much does **one** banana cost?

72p

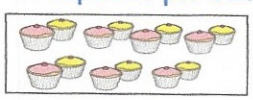


$48 \times 3 = 144$

$144 \div 2 = 72$

8 Doughnuts per box

14 Cupcakes per box



Ruby buys 9 boxes of doughnuts
She buys 10 boxes of cupcakes

Ruby says, "I have twice times as many cupcakes than doughnuts."
Is she correct? NO

$9 \times 8 = 72$

$14 \times 10 = 140$
