

23rd January

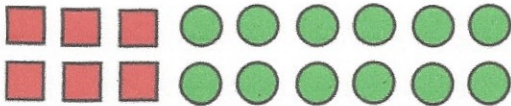

$$2\frac{2}{5} + \frac{7}{10}$$

$$\frac{12}{5} + \frac{7}{10} = \frac{24}{10} + \frac{7}{10} = \frac{31}{10}$$

$$\frac{31}{10} = 3\frac{1}{10}$$

Write down the ratio of green circles to red squares

12:6

→ 2:1

Find the highest common factor (HCF) of 24 and 42

6

Four bananas have a **mean** mass of 120g

The smallest banana is removed.

The **mean** mass of the remaining three bananas is 130g.

What is the mass of the smallest banana?

$$\begin{array}{r} 120 \times 4 = 480 \\ 130 \times 3 = 390 \\ \hline 90 \end{array}$$
