A group of friends earn £30 by cutting grass.

They share the money **equally**  
They get £5 each.

How many friends are in the group?

Carl has these digit cards

He makes a 2-digit number and a 1-digit number.  
He adds them together.  
His answer is a **multiple of 4**

What could Carl's addition be?

$\square + \square \square$

A bottle of water holds 750 millilitres  
400 millilitres of water is poured out  
How much water is left?
