28th September

\[24 \times 1 \frac{2}{3}\]

We have the multiplication:

\[
\begin{array}{c c c c}
& 7 & 4 & 4 \\
\times & 6 & 1 \\
\hline
\end{array}
\]

Eddy had some money.

He spent £2.75 on a coffee.
He spent £1.00 on a packet of crisps.

Eddy has \textbf{two-thirds} of his money left.

\[6,422 \div 19 = 338\]

Explain how you can use this fact to find the answer to \(18 \times 338\)

How much money did Eddy start with?

Work out the area of the trapezium

\[
\text{Area} = \frac{1}{2} \times (9 + 7) \times 4 = 16 	imes 4 = 64 \text{ cm}^2
\]
