

7th September

$$3\frac{1}{2} \times 16$$

$$50 - 2^3 \times 3$$

In this rectangle,  $\frac{2}{5}$  is shaded purple  
 $\frac{1}{6}$  is shaded green.

What fraction of the rectangle is not shaded?

Draw the radius on this circle

$$22,176 \div 84 = 264$$

Explain how the this fact can be used to answer  $84 \times 263$
