

Primary Practice Questions

Corbettmaths

Using Calculations

Tips

- Read each question carefully
- Attempt every question.
- Check your answers seem right.
- Always show your workings

Recap

Remember

- There are daily questions found at
www.corbettmaths.com/5-a-day/primary

1. $47 \times 23 = 1,081$

Use this multiplication to complete the calculations below

$1,081 \div 23$

47

$1,081 \div 47$

23

47×230

10,810

2. $19 \times 345 = 6,555$

Use this multiplication to complete the calculations below

190×345

65,550

19×34.5

655.5

20×345

$$\begin{array}{r} 6555 \\ + 345 \\ \hline 6900 \end{array}$$

6,900

3. $42 \times 31 = 1,302$

Use this multiplication to complete the calculations below

42×62

$$\begin{array}{r} 1302 \\ \times 2 \\ \hline 2604 \end{array}$$

2,604

21×31

$$\begin{array}{r} 0651 \\ 2 \overline{)1302} \end{array}$$

651

42×32

$$\begin{array}{r} 1302 \\ + 42 \\ \hline \end{array}$$

1,344

4. $22,176 = 84 \times 264$

Use this multiplication to complete the calculations below

8.4×264

$2,217.6$

83×264

$$\begin{array}{r} 22\overset{1}{1}76 \\ - \quad 264 \\ \hline 21912 \end{array}$$

$21,912$

84×263

$$\begin{array}{r} 22\overset{0}{1}76 \\ - \quad 84 \\ \hline 22092 \end{array}$$

$22,092$

5. $23,290 = 274 \times 85$

Use this multiplication to complete the calculations below

$274 \times 8,500$

$2,329,000$

27.4×85

$2,329$

$2,329 \div 85$

27.4

6.

$$96 \times 24 = 2,304$$

Explain how you can use this fact to answer 48×12

Since 96 has been halved and 24 has
been halved, divide 2,304 by 4

7.

$$3,088 \div 16 = 193$$

Explain how you can use this fact to answer 17×193

Since $193 \times 16 = 3,088$, just add
193 to 3,088 to find the answer to 17×193

8.

$$11,931 \div 123 = 97$$

Explain how you can use this fact to answer 97×122

Since $97 \times 123 = 11,931$, just subtract
97 from 11,931.
