

11th June

$\frac{2}{3}$ of 15

Grid area for the first problem. The answer '10' is written in a box at the bottom right.

10

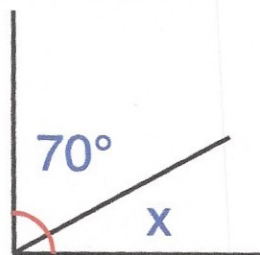

40×20

Grid area for the second problem. The answer '800' is written in a box at the bottom right.

800

Find the size of angle x

20°

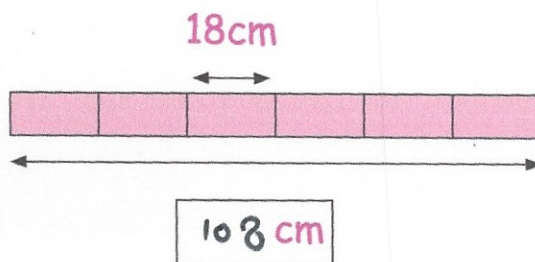

Six identical boxes are placed in a line.

The length of each box is 18cm.

What is the total length of all six boxes?

$18 \times 6 = 108$

In the circles, write a multiple that belongs to each set.

- numbers from 1 to 49 — multiple of 10 — (30)
- numbers from 50 to 99 — multiple of 20 — (60)*
- numbers from 100 to 149 — multiple of 30 — (120)

* or 80
