10th October

10^2

$$\boxed{100}$$

$$\frac{4}{5} - \frac{8}{15}$$

$$\frac{12}{15} - \frac{8}{15} = \frac{4}{15}$$

$$\boxed{\frac{4}{15}}$$

Josie has 1.2 kilograms of flour.

She uses 0.75 kilograms of flour to make a cake.

How much flour does she have left?
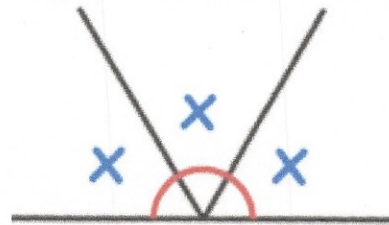

<u>0.45 kg</u>

$$1.2 - 0.75$$
$$= 0.45 \text{ kg}$$

A straight line has been divided into 3 equal size angles.
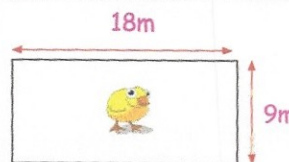

Find the size of each angle

$$180 \div 3 = \underline{60°}$$

Mrs Jenkins is a chicken farmer
Her rectangular chicken pen is 18 metres long and 9 metres wide.
Each chicken needs at least 3m² of space.

How many chickens can she keep?

54

18m
9m

$$18 \times 9 = 162$$
$$162 \div 3 = 54$$
