Name: _____ Primary 5-a-day Platinum

17th November

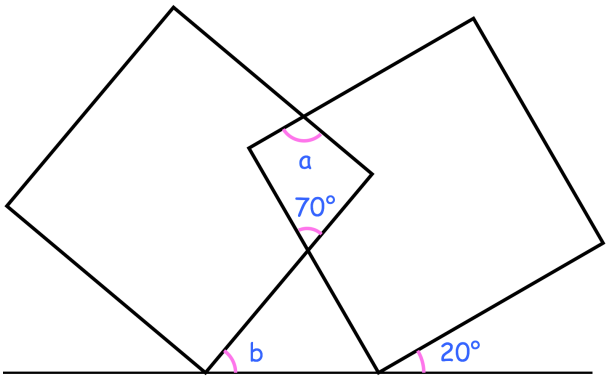
$1\frac{3}{10} - \frac{5}{6}$

$\frac{4}{9} \div 3$

w = 3 and **y** = 19

Work out $9\mathbf{w} - 2\mathbf{y}$

This diagram shows a straight line and two overlapping squares.



Find the size of angle a

Find the size of angle b
