-31

Here is a drawing of a cube on an isometric grid.

Draw a cuboid that has the **same** volume of the cube.

$$4 \times 4 \times 4 = 64$$

$$4 \times 2 \times 8 = 64$$

Here are five number cards.

The mean of the numbers on the five cards is 12.

Five rounded rectangular cards containing the numbers: 13, 5, 18, 2, 22.

Work out the missing number

$$\text{total} = 12 \times 5 = 60$$
