

17th June

$$4 \times 4 \times 3$$

$$2 \overline{) 92}$$

Aarav buys an ice cream for £1.20
He pays with a £2 coin.
How much change should Aarav receive?

Kayleigh is early arriving at the dentist.
Her appointment is at 1pm.
The clock shows the time she arrived.
How many minutes is it until her appointment?

Draw a heptagon
