Name: _____ 5-a-day Gold

7th May

$$\begin{array}{r} 8\ 8\ 9\ 9\ 3 \\ +\ 8\ 8\ 4\ 5\ 7 \\ \hline \end{array}$$

$$\frac{13}{3} = 4\frac{\square}{3}$$

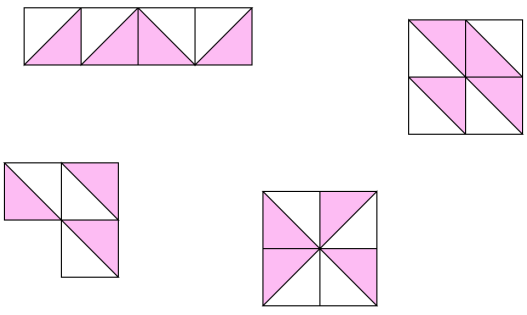
Aidan earns £14 an hour.

He works 17 hours in one week.

He gives $\frac{1}{10}$ of his total pay to his dad

How much money does he give to his dad?

For each pattern put a tick if it has a line of symmetry. Put a cross if it does not.



Joshua has £2 to spend on oranges.
Small oranges cost 15p each
Large oranges cost 25p each

He decides to buy only small oranges or only large oranges.

How many **more** small oranges than large oranges can he buy for £2?
