

3rd September

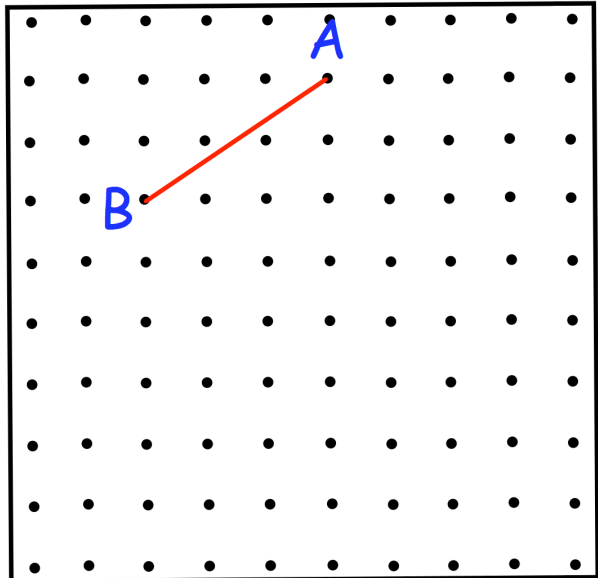

$$\frac{1}{4} \times 8$$

10% of 18

Here is a grid of dots

Points A and B are joined by straight lines.

Draw a line to join point A to another dot on the grid so that the two lines make a right angle

Draw a line parallel to AB

Here are six number cards

Use three of the number cards to make this calculation correct.

$$(\square + \square) \times \square = 8$$
