Name: _____ 5-a-day Platinum

29th August

$\frac{3}{8} =$ ☐ %

$1674 \div 31$

%

Colin runs at a speed of
8 metres per second.

How long will it take Colin to run
40 metres?

Find the value of y

$7y + 5 = 4y + 20$

I am thinking of a number that is not zero.

I **multiply** my number by -3

Tick the statement that is true.

- ☐ The answer must be positive
- ☐ The answer must be negative
- ☐ The answer could be positive or negative
