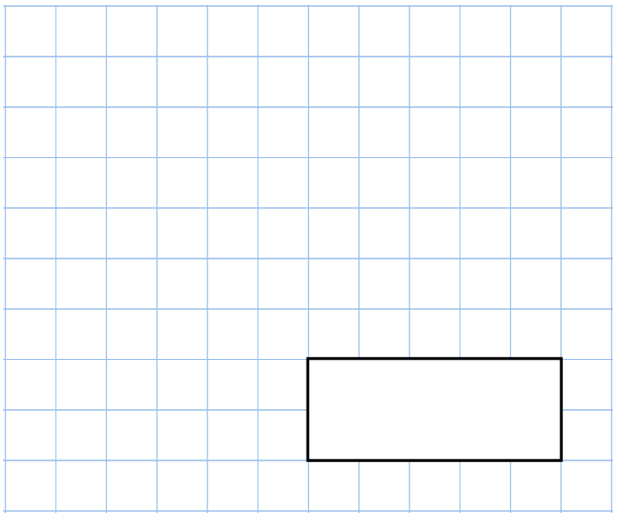
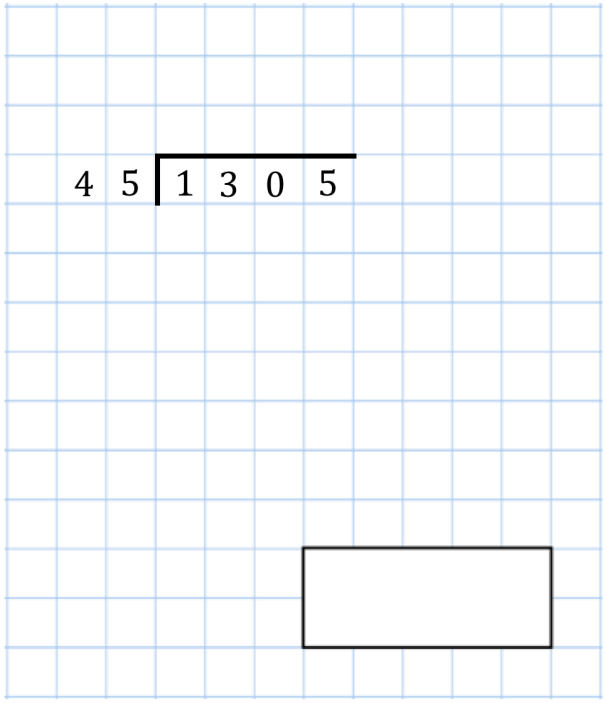
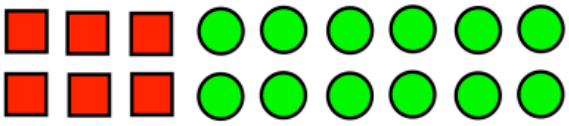
Name: _____ 5-a-day Platinum

23rd January

$$2\frac{2}{5} + \frac{7}{10}$$







Write down the ratio of green circles to red squares

Find the highest common factor (HCF) of 24 and 42

Four bananas have a **mean** mass of 120g

The smallest banana is removed.

The **mean** mass of the remaining three bananas is 130g.

What is the mass of the smallest banana?
