

30th October

$0.065 = \boxed{} \%$

$\frac{\boxed{}}{40} = 0.3$

 $\boxed{} \%$

$42 \times 31 = 1,302$

Use this multiplication to complete the calculations below

42×62

21×31

42×32

A sequence of numbers starts at 15 and follows the rule

“treble the last number and add 4”

15 49 151 457 ...

The number 4,129 is in the sequence.

Calculate the number which comes immediately before 4,129.
