

10th June

$$\frac{7}{15} - \frac{1}{5}$$

Handwritten solution on a grid:

$$\frac{7}{15} - \frac{3}{15}$$

$$\frac{4}{15}$$

$$10^3 = 1,000$$

Handwritten solution on a grid:

$$10$$

A group of 9 friends go on a holiday.
 The total cost of the holiday is £6534
 How much does each person pay?

$$6534 \div 9$$

£726

These two rectangles have the same area
 Work out the width of the yellow rectangle

5cm

A box contains red, yellow and blue sweets.
 In total there are 80 sweets.
 20% of the sweets are yellow. 16
 There are 6 more red sweets than yellow sweets. 22

What fraction of the sweets are blue?

42 blue sweets

$$\frac{42}{80} = \frac{21}{40}$$
