

13th October

$$\frac{10}{3} = 0.\dot{3}$$

$$\frac{1}{3}$$

$$12 + \underbrace{8 \times 13}_{104} + 7$$

$$123$$

Raheem draws an isosceles triangle on the grid.

Two of the points are

$$(3, -1) \quad (-2, -2)$$

Draw the triangle on the grid

Reflect your triangle in the x-axis.

The cost of making a book can be found using this rule

$$\text{Cost} = \text{number of pages} \times 5p + 45p \text{ for the cover}$$

A book costs £6.05

How many pages does that book have?

$$605 - 45 = 560$$

$$560 \div 5 = \underline{\underline{112}}$$
