10% of 18

1.8

Here is a grid of dots

Points A and B are joined by straight lines.

Draw a line to join point A to another dot on the grid so that the two lines make a right angle

Draw a line parallel to AB

Here are six number cards

Use three of the number cards to make this calculation correct.

$$\left(1\frac{1}{2} + 2\frac{1}{2} \right) \times 2 = 8$$
