

6th June

$$\frac{6}{7} \div 3$$

$$\frac{6}{7} \times \frac{1}{3} = \frac{6}{21} :$$

$$\frac{2}{7}$$

$$62.5\% = \frac{\square}{\square}$$

$$\frac{5}{8}$$

A cube has a volume of 64cm^3 Find x

$$\sqrt[3]{64} = \underline{\underline{4\text{cm}}}$$

Michaela thinks of a number.

She **multiplies the number by 4** and then **subtracts 72** from the result.

Her answer equals the number she started with.

What was the number Michaela started with?

$$4x - 72 = x$$

$$3x = 72$$

$$\underline{\underline{x = 24}}$$

$$5,746 \div 17 = 338$$

Explain how you can use this fact to find the answer to 18×338

$$17 \times 338 = 5746$$

So

$$18 \times 338 = 5746 + 338$$

$$(\underline{\underline{= 6084}})$$
