

7th June

$$90 + 3 \times 2^2$$

$$3 \times 2^2 = 12$$

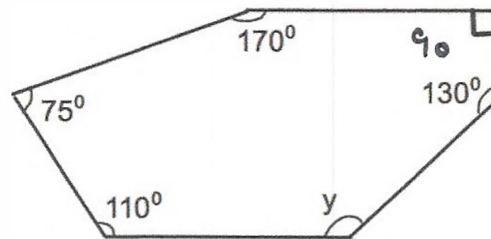

102

$$0.2 \times 2,000$$

400Find the size of angle y .

$$\text{total} = 4 \times 180 = 720^\circ$$

$$y = 720 - 575 \\ = \underline{145^\circ}$$

Circle two numbers that multiply together to equal **100 million**200 **500** 1,000 2,00020,000 100,000 **200,000**

Work out the highest common factor (HCF) of 300 and 120
