

Name: \_\_\_\_\_

Primary 5-a-day

Platinum

27th February

$$- 12 - 23$$

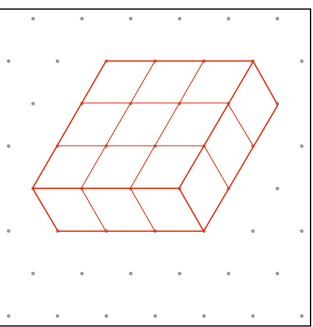

$$1,593,202 - 730,095$$

<input type="text"/>

<input type="text"/>

Ethan uses nine cubes to make a cuboid.

Draw what the new shape could be

He then removes two cubes, leaving the other cubes where they are.

$$12,432 \div 168 = 74$$

Explain how this fact can be used to answer  $73 \times 168$
