

26th March

Simplify  $\frac{1650}{1850}$

$\frac{9}{10} - \frac{1}{7}$

Roger organises a trip to a museum.

The total price of the tickets is £103.50  
The total price for the coach is £64.80.

9 people share the cost equally.

How much does each person pay?

Find the size of angle x.

The diagram shows three regular octagons

There is a blue dot at the centre of each octagon.

What fraction of the diagram is shaded?
