

29th March

$$19 \overline{) 323}$$

$$2\frac{1}{2} \times 15$$

The pie chart shows how a group of 72 students travel to school.

How many students get the bus to school?

What fraction of the students travel by car?

The formula $F = 1.8C + 32$ can be used to convert between Celsius and Fahrenheit.

Work out C when $F = 14$
