|                      |
| <input type="text"/> |

Find the lowest common multiple (LCM) of 35 and 15.

|                      |
|----------------------|
|                      |
| <input type="text"/> |

Find the remainder when 1,520 is divided by 27.

|                      |
|----------------------|
|                      |
| <input type="text"/> |

In this circle, each shaded part is  $\frac{3}{7}$  of the area of the circle.

The two white parts have the same area.

What fraction of the circle is **one** of the white areas?

|                      |
|----------------------|
|                      |
| <input type="text"/> |
