

Name: _____

Primary 5-a-day

Platinum

16th January

$$172 = 300 - \square$$

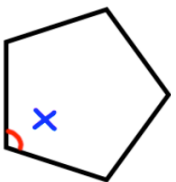

$$825 - 912$$

Using the information that

$$87 \times 456 = 39672$$

write down the value of 870×4.56

Shown is a regular pentagon

There are 80 teachers in a school.

The headteacher says that exactly 43% of the teachers drive to work.

Explain why the headteacher is wrong.

Find the size of angle x
