$$\begin{array}{r} 196 \\ 2 \overline{) 392} \end{array}$$

196

56,000 - 1,945

$$56000 - 2000$$

$$= 54000$$

$$+ 55 =$$

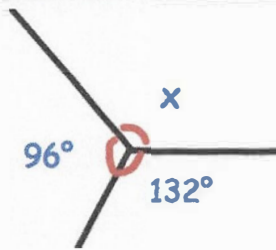

54055

Work out the size of the missing angle

$$96 + 132 = 228$$

$$360 - 228$$

$$\underline{\underline{132^\circ}}$$

A basketball team plays 5 matches  
The number of points they score in each  
match is

58, 41, 57, 49, 55

Work out the mean number of points  
scored

$$\text{Total} = 260$$

$$260 \div 5 = \underline{\underline{52}}$$

A snowboarder completes 5 somersaults  
in a jump.

How many degrees does she turn through  
in the jump?

$$\underline{\underline{1800^\circ}}$$

$$5 \times 360$$

$$= 1800$$
