

Name: _____

Primary 5-a-day

Emerald

1st July

$$\frac{1}{2} \text{ of } 12 =$$

$$79 - 15 =$$

Shade $\frac{1}{4}$ of this shape.

Curtis places pens along two sides of a rectangle.

How many pens fit around all four sides of the rectangle?

Write two numbers **greater than 40** to make this correct.

$$\square - \square = 8$$
