Primary 5-a-day

Platinum

17th July

$$100 - 5^2$$

$$100 - 25 =$$

75

$$0.375 = \frac{3}{8}$$

$\frac{3}{8}$

Find the shaded area

Method 1:

$$9 \times 14 = 126\text{cm}^2$$

$$(9 \times 14) \div 2 = 63$$

$$(9 \times 8) \div 2 = 36$$

$$126 - (63 + 36) = 27\text{cm}^2$$

Method 2:

$$14 - 8 = 6$$

$$9 \times 6 = 54$$

$$54 \div 2 = 27\text{cm}^2$$

$$27\text{cm}^2$$

Shown is a square.
C is the centre of the square.

Find the coordinates of A

$(4, -2)$

Find the coordinates of B

$(4, 10)$
