

12th December

$14 \div 2 =$

7

$41 - 32 =$

9

Starting at the triangle

move 1 square left

then 1 square down.

then 2 squares right.

Place a cross (x) in this square.

James plays 12 football matches.

His team win **three quarters** of their matches.

How many matches did his team win?

$\frac{3}{4} \text{ of } 12 = 9$

9

Write the missing number in the box.

40

$5 \times 8 = 10 \times$
